

## ***Connecting to SVAKO Wi-Fi with Windows 7..***

To connect to SVAKO Wi-Fi it is necessary to configure your computer. There are two ways to do this - automatic and manual.

### **1. AUTOMATIC**

- 1.1. Download "SVAKO. exe" file and click the left mouse button twice on the file. Starts automatic configuration.

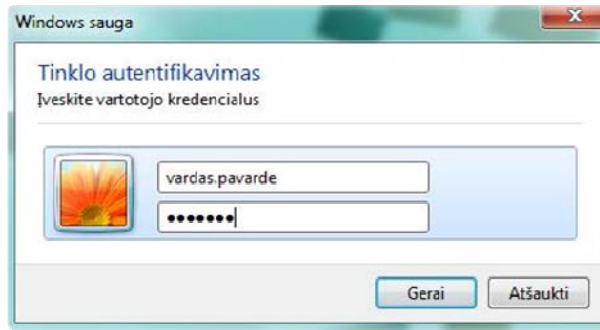

- 1.2. After the completion of the configuration process, there a window appears. Click „OK“.

- 1.3. In the lower-right corner of the screen Notification area in Systemtray find the Internet icon  and click once with left key on the mouse. Select "SVAKO" Wi-Fi and click Connect.

- 1.4. There is a login form in which enter login name - **SVAKO ID** and password - **SVAKO ID password**.

*After completion of these steps you should have access to "SVAKO" Wi-Fi. If you cannot connect please check your login details.*

## 2. MANUAL:

- 2.2. In the lower-right corner of the screen in the Notification area, Systemtray find the Internet icon  and click right key on the mouse. When more options are opened, click **“Open Network and Sharing Center.”**

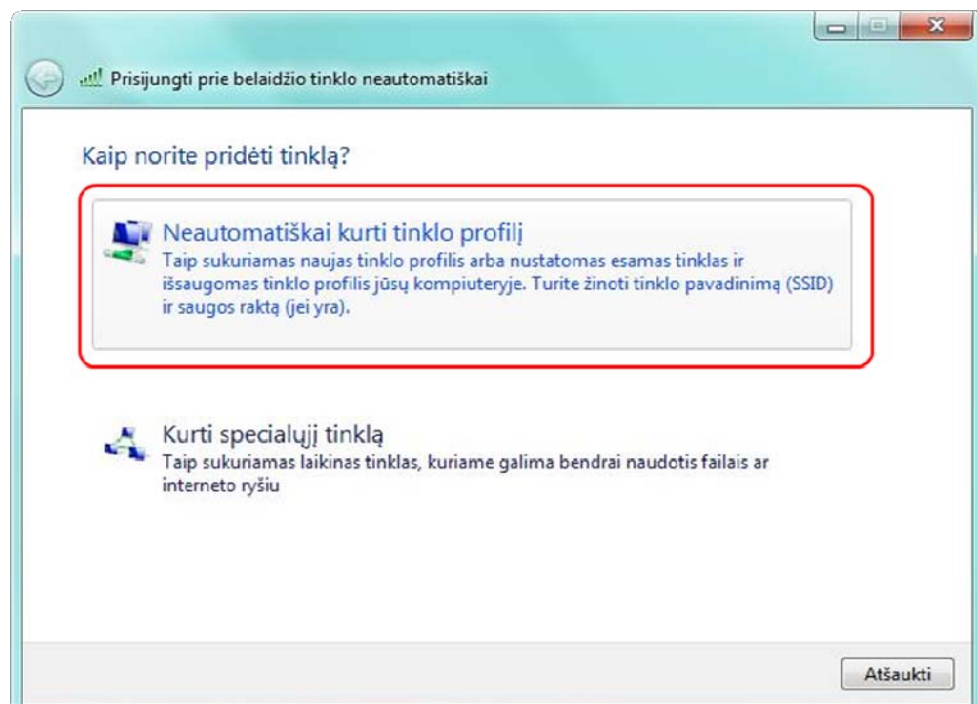

- 2.3. When network and sharing center is opened click on **“Manage wireless networks”**.

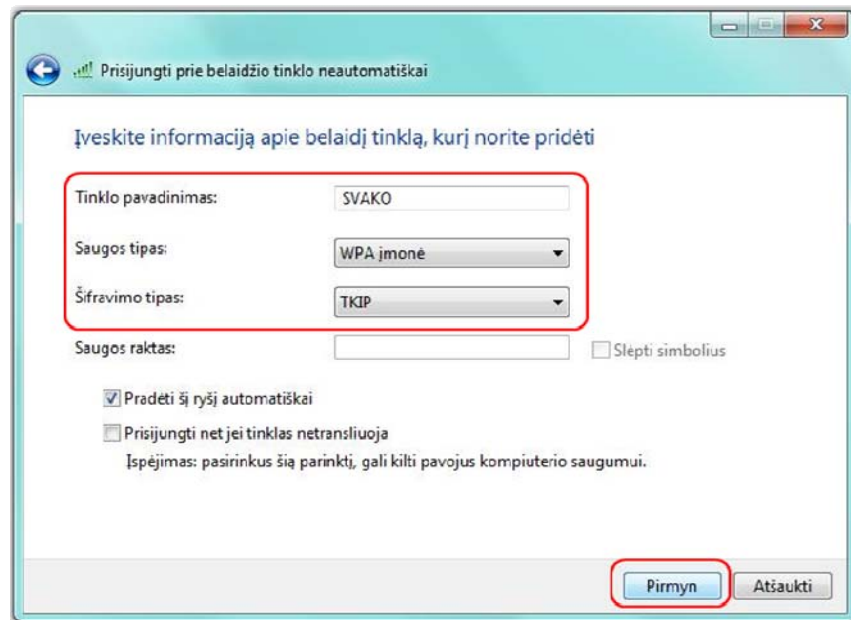

- 2.4. In the next window click **“Add”** .

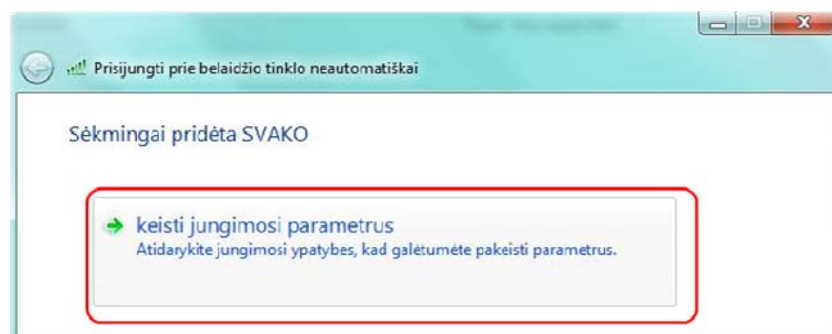

- 2.5. In the next window select **“Manually create a network profile.”**

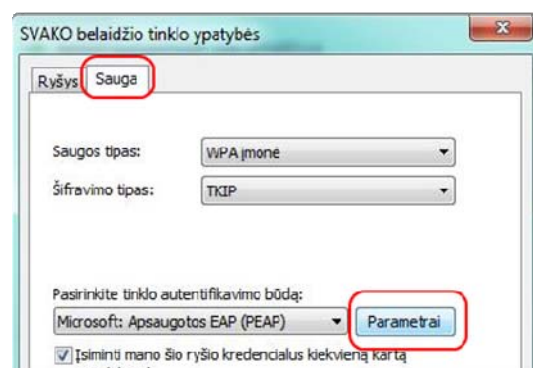

- 2.6. In the newly opened window enter and select everything as shown in the picture below. After filling in boxes outlined in red click **Next**.

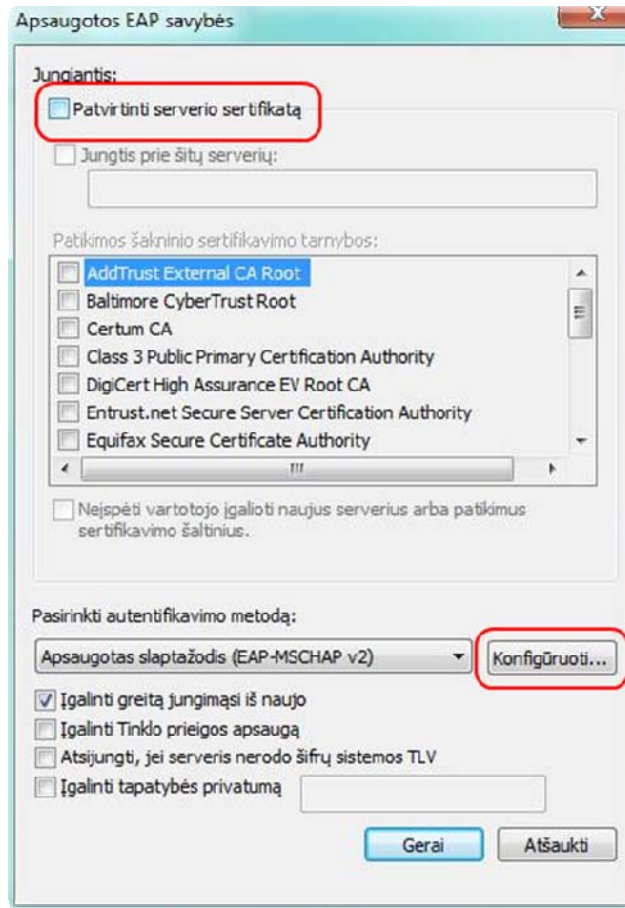

2.7. In the next step select "**Change connection settings**".

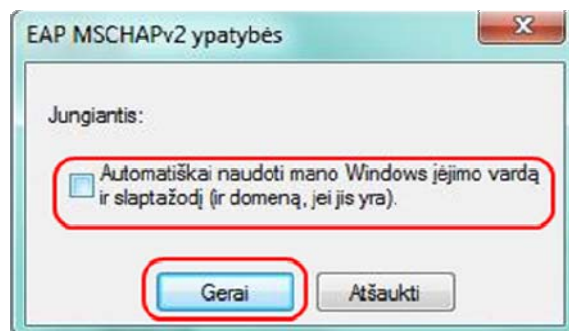

2.8. In the new settings window select the tab "**Security**" and click "**Settings**" as shown in the picture below.

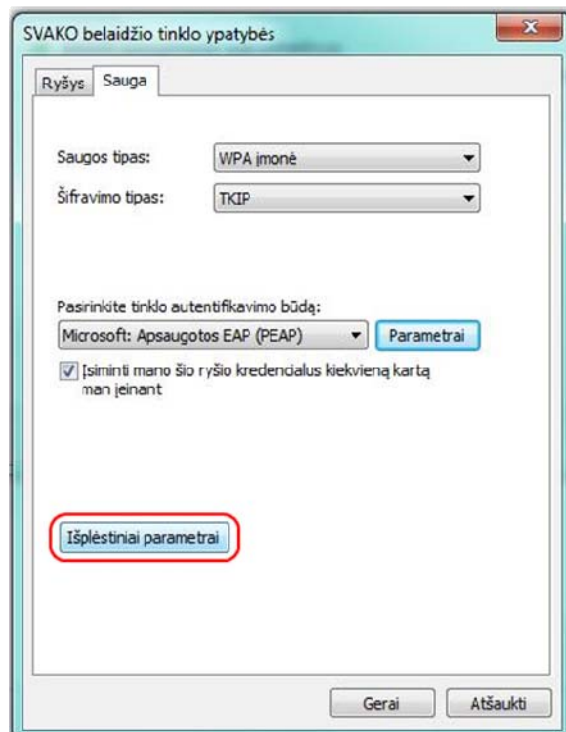

2.9. Be sure to uncheck the box in the new window "**Validate server certificate**". Next click "**Configure**".

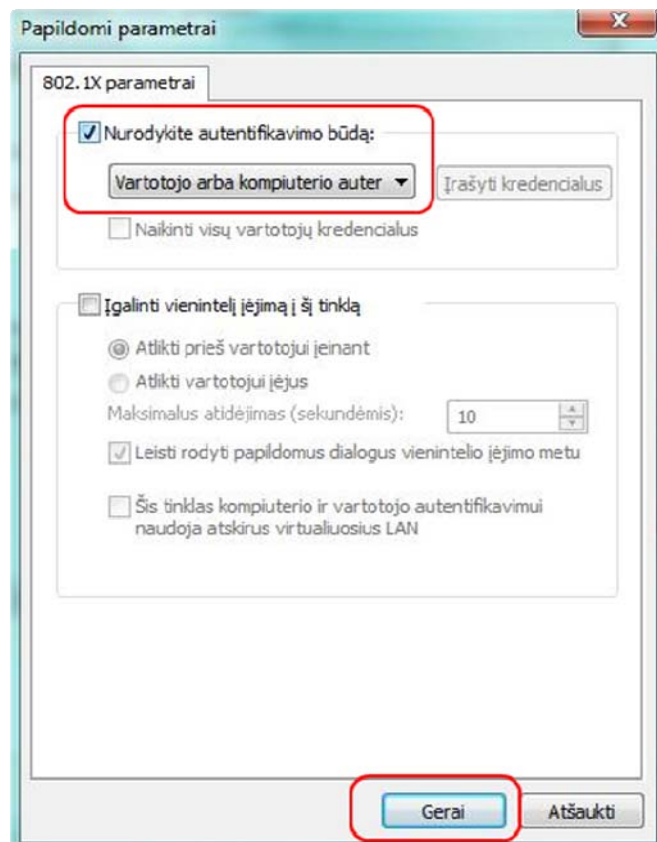

2.10. In the new window, remove the checkmark from **“Automatically use my Windows logon name and password”**. Confirm the configuration in two windows by clicking OK.

2.11. Return to configuration window described in Step 2.8., but now click **"Advanced settings"**.

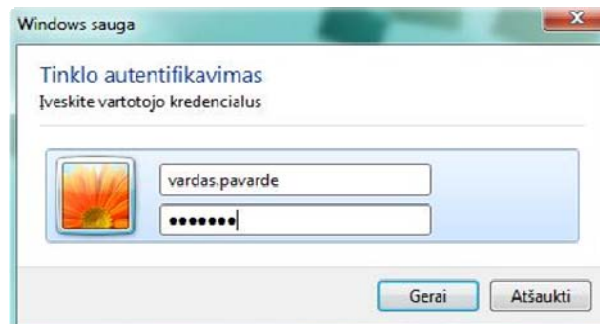

**2.12.** In the next window, select **"Specify authentication mode"**. Confirm the configuration in two windows by double clicking "OK". Configuration is complete.

**2.13.** You can connect now. In the bottom right corner of the Notification area in Systemtray find the Internet icon  and left-click on it once. Select "SVAKO" wireless network and click "Connect".

**2.14.** Opens a login form where enter login name - SVAKO ID and password - **SVAKO ID password**.

*After completion of these steps you should have access to "SVAKO" Wi-Fi. If you cannot connect please check your login details.*
